Description

The Black Alliance for Just Immigration (BAJI) is seeking support to review and update its publicly available legal education resources on immigration law topics affecting Black migrants. BAJI produces PowerPoints and one-pagers

that provide critical information about specific immigration law issues and their disproportionate impact on Black immigrant communities. Over time, changes in law and policy can render these materials outdated or incomplete. This project involves fact-checking draft one-pagers to ensure the substantive legal information is current, accurate, and accessible. The updated resources will continue to serve as essential tools for community education and immigrant rights advocacy.
