### Description

Org 71 was incorporated in Georgia in May 2022 but has been providing services to the community for 10 years. They focus on voter engagement, GOTV campaigns, community meetings, equity in education, healthcare, and economics. They work to “bridge the rural-urban divide that alienates many community members from understanding and/or engaging in government processes that affect their daily lives.” They are near the end of the process for formalizing their nonprofit.

They need an attorney to assist them with filing and submitting their paperwork to obtain their 501c3 status.
