Description

In 2022, the LFAA endorsed the California Legislature's formation of a Task Force to study and develop reparative proposals for reparations. Following this, a group of LFAA volunteers formed the LFAA Reparations Taskforce to educate itself on reparations and share this knowledge with the Alliance. In 2023, the California Reparations Taskforce released its 1,100-page Report, which gives historical context to the case for reparations and makes recommendations.

The LFAA Task Force is currently planning a slate of 2024 events as well as an accompanying work product, which requires new volunteers.
