Description

Established in 2016, HERHealthEQ (HHEQ) was born out of a need to reduce the equity gap in access to healthcare for women around the world. What began as a singular donation of a mammogram machine to a Costa Rican hospital, has now grown into an international web of healthcare solutions. The team is driven by a desire to improve women's health in developing countries by providing access to medical devices &

equipment, creating an equitable standard of care. HHEQ is in the process of evaluating and applying for funding opportunities to achieve these goals.

The organization is looking for an attorney to assist with reviewing and analyzing the various requirements and other legal considerations as the organization prepares to apply for funding through the **Action for Women's Health Program**.
