Publications & Research

04 Sep 2025

Currently, the incarcerated population does not have clear regulations on emergency protocols should there be a disaster of some sort. For example, during COVID-19, the detention and incarceration facilities were ill-equipped to handle the massive exposure, illness, loss of life, and medical needs of the incarcerated population. The attached memo, chart, and tables provide an overview of laws and regulations regarding emergency protocols in detention & incarceration facilities.
